

Level 1 Foot Care Training

IDHC's Free Professional Development Opportunity

How to Prevent & Reduce Diabetes Foot Complications and Amputations
In Indigenous communities.

This Three-Day Training provides:

- Introduction to diabetes and complication prevention
- Incorporating holistic healing and traditional medicine to prevent and self-manage foot care
- Utilizing foot care tools and practices for education and screening

This is a professional development opportunity for community health practitioners that work in Indigenous communities. Participants will learn how to prevent and reduce diabetes-related foot complications and amputations with Indigenous community members. Certificate of completion will be issued to attendees who successfully complete training. Graduates are qualified to apply for Certified Indigenous Community Diabetes Support Worker standing through the Indigenous Certification Board of Canada (ICBOC).
